

Simple. Powerful.

MobilityCentral™ from CMServices gives you the powers of a corporate superhero, allowing you to administrate an entire mobility program single-handedly. It gives you the abilities to control wireless costs, manage all devices and their users and implement mobility policies.

MobilityCentral™ is a simple yet powerful SaaS solution that saves time and money by giving you the tools you need to manage your wireless program in-house through a simple, powerful application.

With MobilityCentral™ you can...

Complete days worth of work in minutes.

MobilityCentral™ gives you quick access to key information from all your carriers in one place.

Shrink costs dramatically.

With MobilityCentral™ you can monitor your spend, track performance year-over-year, identify overages and zero-usage devices, and more. All these lead to a significantly leaner mobility program.

Instantly distribute reports.

All of MobilityCentral's™ reports are configurable to your specific needs. Simply export and distribute as necessary. You can also communicate directly with users from within the application.

Implement MobilityCentral™ in a flash.

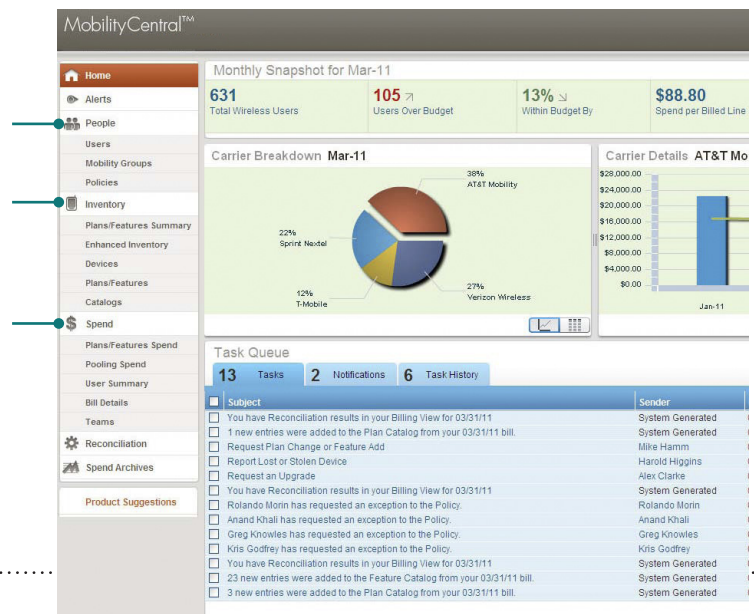

Industry-leading implementation time means you can experience the ROI of MobilityCentral™ in no time flat. This is a true cloud solution that only requires one administrator who's ready to perform epic feats of mobility management.

The Power To Control

People | Gain access to your entire corporate directory to see who has which devices, how they're using them, and how much they're costing you. MobilityCentral™ gives you instant omniscience over your mobile workforce.

Inventory | Instantly peruse your entire device inventory, including the plans and features associated with each one. Deploy and enforce corporate mobile policies.

Spend | MobilityCentral™ instantly lets you understand all the costs associated with your mobility program. Within minutes you can begin taking steps to saving your company on wireless costs.
