

## Why OPT-E-WAN?

OPT-E-WAN is a strategic choice for your business. OPT-E-WAN provides a cost effective all-Ethernet seamless network solution to meet your large bandwidth requirements.

## What is OPT-E-WAN?

OPT-E-WAN is a VPLS (Virtual Private LAN Service), that extends Local Area Networks and Metro Area Networks to Wide Area Networks.

This all-Ethernet solution allows for scalable bandwidth. Its Layer 2 utilizes MPLS to fully mesh your locations and flexibly support applications and protocols.

OPT-E-WAN can be configured as virtual point-to-point, point-to-multi-point, or multi-point to multi-point. It provides interstate and intrastate Ethernet networking in speeds from 0.5mbps to 1000mbps.

OPT-E-WAN offers easier lifecycle and routing support while requiring less routers than an MPLS/Layer 3 network. It allows you to self manage your network giving you control of your switching, routing tables and security.

## Benefits

- Multicast- one-to-many communication over an IP infrastructure
- IP routing control and flexibility: You maintain complete control over routing. No need to share layer 3 routing tables
- Layer 3 Protocol independent – natively supports IP, IPX, NetBIOS, SNA, etc.
- Inherent Ethernet Any-to-Any connectivity model
- Support for point-to-point, point-to-multipoint and any-to-any type of network topologies for maximum flexibility and widest choice
- 4 Classes of Service available to prioritize your applications
- Optional Features include Pop Diversity, Access Diversity, Additional MAC addresses and Diverse Line Card
- Available with 1 thru 5 year term commitments
- Billing: Corporate or MARC (Minimum Annual Revenue Commitment)
