A Total Voice Solution At A Competitive Price!

Businesses that rely on local and long distance voice connections can't afford to compromise reliability and service. The solution is **ACC Business PrimeXpress**, a digital trunking service that can actually cost less than similar service from the local phone company and is supported by the dependable AT&T Network.

ACC Business PrimeXpress connects a PBX directly to an AT&T Class 5 Switch via a T1 facility that provides 24 voice paths per T1. Businesses gain full access to AT&T's local, intraLATA and long distance networks, along with Toll Free and International capabilities. The PBX equipment must include a digital trunk interface card or have the capability to install a card to use this service.

Maximum Savings

ACC Business offers you a competitive, quality alternative over your local exchange carrier by utilizing **ACC Business PrimeXpress** service. You can contract for service and take advantage of our great 1-, 2-, and 3-year term plans — the longer the term, the greater the savings.

Maximum Features

As a standalone local service, **ACC Business PrimeXpress** service provides great value for businesses looking to upgrade their local service:

- Access to a fiber-based, fully-digital network.
- Service features that originate from customer's premise equipment.
- Fast connections.
- Ability to handle higher call volumes.
- Displays Calling Party Number (CPN)/Billing Telephone Number (BTN) sent – one BTN per trunk group (outgoing).

Wide Range of Service Options

Businesses may choose from these service types based on the needs of their business and the set up of their PBX:

- **Direct Outward Dialing (DOD)** - Lets employees dial out from behind a PBX without going through an attendant.
- **COMBO/Main Listed Number (MLN)** - Lets employees dial out from behind a PBX without going through an attendant. Routes callers to an attendant (does not allow direct inbound call completion to an employee).
- **Direct Inward Dialing (DID)** - Lets callers directly reach an extension inside a company without going through an attendant.
- **DID/DOD** - Provides two-way trunking, which allows DID and DOD calls to be placed on each channel on the T1.

Total Benefits Total Savings: A complete, price-competitive, digital-quality local service alternative over your Local Exchange Carrier (LEC).

Total Quality: Crisp, fast connections to the AT&T Network, considered the most advanced, self-healing, fiber optic network in the industry.

Total Simplicity: Full local functionality, local number portability, experienced support and personalized customer care.

AT&T Network Reliability: 24-hour, end-to-end network monitoring and disaster avoidance, providing an exceptional 99.99% uptime.
PLUS: Any-distance calling, including local, local toll and long distance, backed by personalized customer service.
