

Fixed Wireless Data Services

The data service you will never outgrow

Airband provides all of the data services you'll ever need, whether you are a small business or a Fortune 1000 company. With our WiMAX fixed wireless network, Airband literally goes above and beyond existing landline infrastructure to eliminate installation hassles and deliver lightning fast speed – all at affordable rates. And our services can be installed in a fraction of the time generally quoted by traditional providers.

2 to 20 Mbps Delivered in Days: With Airband, you can install new service without the hassles and long lead times associated with traditional landline services. Initial installation takes just a matter of days, not weeks or months. Bandwidth can be easily upgraded within hours.

Ethernet Connectivity: Our data service is delivered via an Ethernet connection, making it simple for you to manage and connect to your LAN.

Wireless Private Line Scalable to 1Gbps: Airband offers dedicated private line products up to GigE speeds for enterprise customers who need WAN extensions to their current network.

No Upfront Capital Investment: There is no additional equipment cost to implement Airband's data services and upgrading circuits will not require equipment upgrade charges.

Reliability You Can Count on: With our Dual-Path-Service-Deployment design, our network is not vulnerable to major fiber and cable cuts.

Secured Transmissions: Our wireless hardware utilizes Advanced Encryption Standard (AES) from 128 to 256 bits to protect your data.

Ensuring Quality of Service: We deploy eight levels of signal modulation and our radios automatically choose the appropriate level to ensure optimal throughput. We're the only service provider in the industry that have service level guarantees on jitter, in addition to latency and packet loss.

KEY BENEFITS

- Scalable bandwidth on demand
- Installation in days
- Ethernet connectivity
- Dual path deployment
- 100% uptime guarantee
