

PRODUCT OVERVIEW

Your office communications have just been simplified. AirePBX is the flexible, functional and affordable new cloud hosted IP PBX, which brings the power of AireSpring's award winning IP network to small and medium sized businesses nationwide. The power and features you need, but without the hardware to buy, install, configure, host, or maintain. Customers will only need to maintain IP telephones.

AirePBX is offered over Airespring's nationwide fully managed next generation IP backbone. Competitors offer service over an unreliable and unsecure public internet, but AirePBX finally allows customers to have a hosted solution over an end to end managed network that fully controls voice quality issues that traditionally plague VoIP implementations.

COVERAGE: Largest nationwide coverage available.

AIRESPRING ANYWHERE: With AireSpring *Find Me Follow Me* and *Virtual Private Numbers* features, you'll get your calls wherever you are even if you are not at home or the office. Your phone number follows you like a trusty friend.
