

AireSpring SIP Trunking

PRODUCT OVERVIEW

Fast, scalable, affordable and available almost everywhere.

Stay profitable. Don't overpay for your phone and data services. SIP Trunking has emerged as the next generation value proposition that enables the convergence of voice and data on a single circuit (if you wish) at an operating cost as much as 50% less than traditional TDM solutions. More importantly, AireSpring SIP Trunking is the ultimate VoIP product which gives your company all the telecom power it needs to operate at peak efficiency while saving the maximum amount on your telecommunications bills. That means a much faster return on the typical hardware investment and the opportunity to focus more resources on making businesses grow.

KEY FEATURES/BENEFITS OF SIP TRUNKING

As your business grows, nothing can keep up with you as well as the AireSpring SIP Trunking products. Whether you have a standard phone equipment or modern SIP enabled equipment, AireSpring has a local solution for you!

- Most competitive rates per trunk
- Supports G711, G729 Codecs
- SLA Provided through Airespring Public/Private IP access
- Huge savings over traditional lines or trunks
- Built in network diversity provides a high level of network security and protects you from outages
- Choice and cost. Simple IP connections with the public internet or private IP infrastructure gives the consumer greater options, less dependence on hardware and a greatly reduced price
- Only need to maintain one IP-based connection for both data and voice
- Fewer circuits, less interfaces, more efficiency, more cost effectiveness
- Increased enterprise productivity and applications efficiency

LONG DISTANCE SIP TRUNKING

AireSpring Long Distance SIP Trunking was built to handle the high calls per second which today's contact centers and equipment require. No monthly charge per channel or simultaneous call path for long distance or toll free-service! Long Distance SIP Trunking is the ultimate product for companies needing high volume outbound only service. Most turn ups within 24-48 hours. VoIP mobility. Location independence instead of the traditional attachment to physical location of PSTN

LOCAL SIP TRUNKING

Traditional PRI's require you to purchase 23 lines at a time and can take over a month to install, resulting in buying more lines than you need and waiting too long to get them. SIP Trunks are fast. You'll buy only what you need.

- Nationwide DIDs available
 - Flexibility of having local DIDs in multiple locations around the country which ring to you locally
 - Obtain local numbers for remote users
- FREE On-Network calling . Call all of your remote offices, on the AireSpring network, for FREE
