EXAMPLE: Customer chooses CenturyLink and makes a 500 Meg commitment @ \$15 per Meg and bursts to 600Mbps. The customer will be billed \$15 for the 500 Meg and the overage of 100 Meg will be billed at \$24 per Meg (500Mbps x \$15) + (100Mpbs x \$24) = \$9900. If the customer initially committed to 600 Meg the total would be \$9000. In the interest of your customer you should get as close to the actual need as possible.
