A CNDC request is required in the following scenarios - See Job Aid for more details

- When Diversity is required** Diversity requires engineering design and must use the POM Process. DCI rates will not apply.
- When the Loop speed is = or > 10 GBPS** Used for Capacity Checks and may follow the process outlined in the job aid once verified by CNDC
- All in Region requests** If Data Center is physically located IN Region (14 Legacy Qwest IR states), a CNDC is required. (A capacity check and an AQCB will be done with the CNDC request.)

Quote Process Example

Step 1

Determine Availability using the Pre-Qualified Data Center List on the BMG Intranet

Provider
Joe's Hosting
Address
350 E Cermak Rd Chicago, IL 60616
Suite
500
Qualified?
Yes

Step 2

Determine Service Type

Service Type
iQ Public

Step 3

Determine the term

Term
24 Month

Step 4

Determine Speed & Finalize Price

Access (Loop) Speed

1 Gbps

Port Speed

200 Mbps

Diversity Required?

No

Loop Speed = or > 10 GBPS?

No

In Region?

No

\$6.65 MRC per MB

Next Step - Order Process

Refer to Job aid for detailed directions:

- 1) Create a quote in QVO. Print Quote and submit to customer
- 2) Use Contract Generating tool through SFA "Generate Contract" to create contract.
- 3) Use QVO Quote as attachment to contract.
- 4) Use Standard Order Procedure
