VisionCast Meeting	VisionCast Auditorium & Event
For meetings with up to 125 attendees.	For meetings with up to 2,500 attendees.
No reservation required; available on demand.	Must be scheduled at least 24 hours in advance.
You control the level of collaboration by selecting from a set of interactive tools (PowerPoint viewer, document viewer, application sharing, desktop sharing, whiteboards, chat).	Presenters are designated at the beginning of the meeting; audience participation is limited to polls, Q&A, shared applications, and mood indicators – all facilitated by the operator.
Perfect for product demos, sales presentations, staff meetings,	Perfect for employee meetings, training seminars, IR calls,

brainstorming sessions, contract   executive sessions
reviews.

  Read More

- Record and Playback allows presenter to record the presentation for later review.

- Security protocols safeguard your proprietary information

- Post-event reports recap attendees, responses to polls and other feedback.

Add These Enhancements!

Broadcast Messaging offers immediate and simultaneous access to your entire target audience or market via Blast Email, Blast Voice Mail and/or Blast Fax. Premiere Communications coordinates all details of these instant communications.

SoundByte is a cost-effect means of extending the life of your meeting, SoundByte provides 24/7 access of a recording of your live event so that those who could not attend can receive the same information. SoundByte editing services allow you to add music and professionally edit your program. You can also give callers the opportunity to answer survey questions, leave voice mail messages and access a live assistant if they have more questions.

ReplyLine RSVP makes it easy for your target audience to participate by providing them with an easy means to respond to your event's invitation and get the dial-in number and pass code they need to participate. ReplyLine lets event organizers gauge participation levels, collect pre-meeting opinions and information and re-invite guests who have not responded.

SoundCast is a Web-based audio solution that allows you to simulcast your meeting on the Web to expand the reach of your message beyond your live event. SoundCast participants have real-time, listen-only access to the same information as your conference call participants. You can also encourage participants to submit feedback and questions via SoundCast's email link and data capturing functions. SoundCast also extends your message with a 30-day replay feature, giving more invitees the opportunity to participate after the event.

Dial-Outs personally bring important attendees/speakers into the call via an operator.

Listen Only/Lecture Mode allows operator to mute all lines so speaker can present without interruption or unwanted noise.

Sub-conferences allow breakout sessions or private conferences with selected participants.

Fulfillment provides a turnkey option to send advance information or post-meeting packets to invitees.

Audio Production utilizes Premiere Conferencing's professional grade recording and editing equipment to produce high quality recordings for playback and reproduction.

Web Presentation Services provide experts who coordinate rehearsals and advise on timing, flow and techniques.

Conference Recording allows you to extend your message reach by making copies of your meeting for distribution or reference. Sessions can be recorded to cassette, CD or Audio File.

Transcription Services document calls, satisfy legal requirements, and provide an archive of the event for internal or external purposes.

Translation extends your message to international participants via live translator during the call.

Recording Duplication provides professional grade recordings for single or bulk duplications.

Custom On-Hold Music and Announcements allows client provided audio to be played into conference.

Post Event Reporting merges information from registration, participation and polling to provide the client with requested info about each participant.
