EarthLink Complete™

INTEGRATED VOICE & DATA

Consolidate voice, data and Internet over a single, high-speed connection.

EarthLink Business offers an extensive suite of bundled, integrated voice and data solutions for businesses of all sizes. Whether you prefer dynamic or channelized delivery for your integrated lines, trunks or PRIs, we can help.

Integrated access services provide you with a host of reliable telephone service options, from 3 to 24 lines and high speed Internet including PRI, line side service and trunks. When voice lines are not in use, dynamic bandwidth is available for Internet access and data applications, offering more efficient bandwidth use and improved productivity.

Ask about our Converged Minutes plan option, which delivers long distance and mobile in a shared environment that removes the minute barrier between domestic long distance and mobile minutes to create a pooled bucket of minutes.

Benefits | Features

- Take advantage of consistent bandwidth, with the same upload and download speeds for a consistent level of service.
- Simplify your communications by bundling long distance with mobile minutes and even share all minutes between multiple locations. This service package also includes one free mobile line.
- Each bundle includes value-added services including conference calling minutes, web hosting, voicemail boxes, online faxing, a toll free number and email accounts.
- EarthLink Business helps conserve your capital and improve your business. Maximize your savings by bundling in a phone system with one monthly price for local, long distance, Internet, mobile and equipment.
- Eliminate upfront costs and reduce your IT and networking costs. And with optional MPLS VPN, you can easily connect multiple locations over our next-generation backbone-and make it even easier to deploy the latest IP-based, converged services and realtime applications.

- Analog, digital and SIP voice services
- Port speeds from 1.5mbps to up to 100Mbps
- A wide range of bundled features: free Caller ID Name & Number, Call Waiting, Call Forwarding, Direct Inward/Outward Dialing, Hunting, remote access to call forwarding, speed calling, three-way calling and many more.
- Ability to add MPLS capabilities
- Local calling options
- LD/Toll-Free options
- Service Level Agreements
- Direct inward dialing with PRI improves access to your employees. Reach your key staff and departments directly without going through a switchboard or auto attendant.
