

OnePac Trunk/PRI Bundle

You act like a "big" guy. You bought the same PBX equipment. Your communications network is a well-oiled machine. Now, take advantage of your equipment with services made for the company that is just your size. Get it all—local, long distance and Internet access services—in one digital connection. Giving you the services you need, in the size and price that is right for you.

Voice and Data Together

TelePacific's OnePac delivers both voice and data over a high capacity T-1. This dynamically allocated service uses your idle phone channels to boost the capacity of your data access when your phones are not in use. Your bandwidth automatically adjusts based on the number of voice channels utilized at any given moment.

With the OnePac Trunk/PRI Bundle, you get...

- ▶ High capacity, end-to-end digital voice connections in the flavor—fractional SuperTrunk or PRI—that meets the needs of your business.
- ▶ Internet access service over our fully-meshed IP network with Service Level Agreements offering up to 99.999% uptime.
- ▶ Aggressive minute bundles suitable for your traffic patterns.
- ▶ Eight voice and data features to enhance your internal and external communications and efficiency of your business.

Dynamic T1

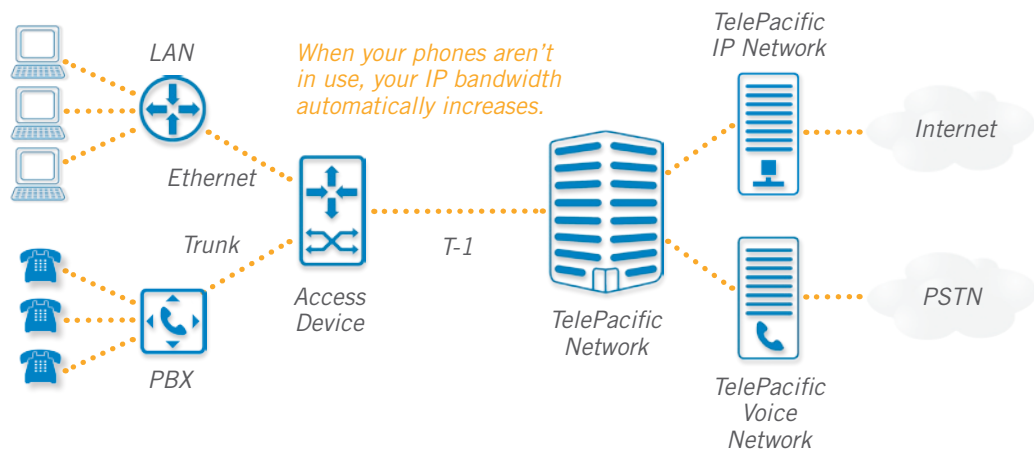

We make sure you have enough voice channels for your calling patterns. And when a line isn't in use, you'll benefit from increased bandwidth.

Get more from your dedicated Internet access when your business uses TelePacific for its voice and data needs.

As always with TelePacific, you get:

- ▶ 24-Hour Technical Support
- ▶ Toll Fraud Monitoring
- ▶ Voice and Data Service Level Agreements

OnePac Trunk/PRI Bundle Architecture

Choose Your Voice Services

- [] Our fractional SuperTrunk offers the power and performance of high-speed digital networking to meet today's business needs. This high capacity, end-to-end digital connection allows for 8 or more simultaneous calls and a total of 24 channels for voice and data access.
- [] Our fractional Voice Only PRI offers you a T1 circuit that allows for 8 or more simultaneous calls with a total of 23 channels for voice and data services. The 24th channel allows for faster connects and disconnects on calls, which saves time and money.

Confidence in your data service

- [] Your Internet connection is only a click away with TelePacific's Dedicated Internet Access (DIA). You can trust that your connection will be there when you need it.

Included in Your Package

OneCentral	An online service portal that allows you to examine your bill, generate custom views, and access tools for performing in-depth statement analysis with downloadable content.
Fax to Email	OnePac provides three fax-to-email boxes. Access your faxes anywhere you access your email. There are no busy signals when people try to send you a fax, and confidential faxes go straight to your email box.
IP Addresses	OnePac provides 8 IP addresses. Of course, TelePacific offers up to 256 IP addresses based on utilization at no additional charge.
Email Hosting	OnePac provides email hosting for up to 64 email boxes. Need more? They are available a la carte.
Domain Name	OnePac provides domain name transfer, hosting, and registration for one domain name at no additional charge.
Caller ID	Caller ID provides visibility to inbound caller information necessary for call screening and screen pop-up applications.
Direct Inward Dial Numbers	OnePac includes up to 100 Direct Inward Dial (DID) numbers. Give each employee their own number so that customers, prospects, and employees can dial each other directly. Eliminate the need for all inbound calls to go through a receptionist.
Station to Station Dialing	Allows your employees to dial each other in two to six digits. If you are calling from a single location or to multiple locations, on our network, there are no additional charges. These calls to your employees are free.
