

Google Business Apps

Google Business Apps leverages the power, innovation, and security of the Google infrastructure to provide our customers with the latest and greatest messaging and collaboration tools. Not only does Google Business Apps provide the staples of messaging such as email, calendaring, and chat, but it also provides more advanced features such as docs, sites, video, and message discovery and archiving.

Advantages

- Accessible from any where in the world via the Internet
- Scalable Google infrastructure
- Administrator and user level security mechanisms protect and secure data at multiple levels
- Allows companies to mitigate this risk by avoiding the local storage of data onto users' laptops

Mail: Make e-mail a usable information tool with Gmail

Talk: Instant messaging within and outside your business

Calendar: Personal, shared, and public calendars

Docs: Simple real-time document collaboration from anywhere

Sites: Easily created and edited group

Start Page: Your personal view of all your information

Message Security: Protect email from malware and implement compliance policies

Video: Securely share internal videos
