

MPLS Networking Solutions

Windstream's MPLS Networking provides managed solutions that extend communications across multiple business locations. This product enables users to prioritize voice or data through quality of service (QoS) levels, based on their unique business requirements. MPLS Networking Solution is a private, secure network solution built across the Windstream core MPLS (Multi Protocol Label Switching) advanced IP network.

Advantages

- **Performance:** Maximize network performance by dynamically allocating bandwidth among voice, networking and Internet/data applications.
- **Flexibility:** Change traffic patterns when your business needs change.
- **Any-to-Any Connectivity:** A “fully-meshed network” allows regional sites to exchange data without consuming unnecessary bandwidth at the hub.
- **Compatibility:** Compatible with all industry standard VoIP protocols and applications.

Features

Flexible Routing Options:

- **VLS:** Maintain control over your own routing and IP addressing plans.
- **VPN:** Windstream manages everything for you.

Quality of Service options to meet your business needs:

- **Real Time QoS:** This preferred voice networking solution delivers premium QoS to your site allowing you to maintain your own VoIP network.
- **Business Critical QoS:** This preferred data networking solution provides priority treatment to data networking packets over Internet traffic. Ideal for video conferencing solutions.
- **Best Effort QoS:** A best effort data networking solution, enabling customers to share data and Internet applications across all locations.
