Nationwide local, 800 dial up access, and International dial up access; superior network speed, reliability, and throughput; Access Finder software and reporting tools, and 24x7 network monitoring and NOC to NOC support are all features of XO Corporate Dial.

With XO™ **Corporate Dial** you can:

- Gain greater network capacity, performance, and reliability while reducing total operating costs and time to market;
- Direct your IT resources to other business areas and let XO manage your access needs;
- Access daily and monthly usage reports on the Web for end-user monitoring;
- Access FTP site to download daily, monthly and yearly usage statistics;
- Manage your users real-time using sophisticated management software.

Corporate Dial:

- Supports multiple modem standards including V.90 (56kbps);
- Supports PPP protocol;
- Gives you ubiquitous Internet dial-up access;
- Includes substantial national (73% of the U.S. market) and international footprints;
- Enjoys superior speed and quality associated with the robust XO fully peered, facilities-based Tier I Internet backbone;
- Provides both domestic and global remote IP dial access to the
    - Public Internet
    - Local Area Network (LAN)
    - Virtual Private Network (VPN);
- Can be purchased with XO VPN to meet both your connectivity and security needs;
- Gives you the control to manage your employees access permission rights;
- Provides 24 x 7 Network Operations Center (NOC) to NOC support.

In today's Internet economy, dial-up access is a necessity; it's the way most people access the Internet. *Industry statistics demonstrate that 85% of those that access the LAN remotely are currently using dial-up connections.*[†]

Corporate Dial Features:
Whether you need a national dial-up solution to fit your employees' working from home needs, teleworkers or international travelers, XO Corporate Dial has the features, flexibility and pricing to help meet your mission.

- **Nationwide Local Dial-Up Access**
  Direct access to the XO Internet backbone from multiple Points of Presence (POPs) in the continental United States, Alaska and Hawaii.
- **International Access**
  Optional metered access that allows users to dial-up from over 150 countries.
- **800 Dial-Up Access**
  Optional metered access that allows users to dial-up from any location in the United States.
- **Access Finder Dialer Software**
  The Access Finder software locates an XO access number for you to use for local dial-up access. If there are no local numbers available, Access Finder will provide you with an 800 access number.
- **Web-based Management Tool**
  Powerful reporting tool that allows you to measure daily and monthly usage statistics per end-user, in real-time. Provides your network administrator the ability to add or delete users and/or groups and manage individual usage permissions.

Not just talk.

- **PPP Support**
  Corporate Dial supports Point-to-Point protocol (PPP), which supports error detection, address notification and allows for multiple protocols to share the same line. PPP also supports both synchronous and asynchronous communication.
- **Modem Support**
  XO Corporate Dial supports the following modem standards:
  - o V.90 (Connection speeds up to 56 Kbps)
  - o V.32 (Connection speeds of 9600 Bps)
  - o V.32 BIS (Connection speeds up to 14.4K)
  - o V.34 (Connection speeds up to 33.6K)
- **Independent Network Monitoring**
  Etesting Labs, a highly respected third party ISP rating firm, measures factors such as modem connect speed, time to login, latency and throughput.
- **Network Monitoring and Support**
  24 hours a day, 7 days a week.
