XO™ ETHERNET SERVICES

Broadband Connectivity for Private Networks within and between Metropolitan Areas

XO PRIVATE DATA NETWORKING

Connections from 10 Mbps up to 1 Gbps, 24x7 monitoring and customer care support, Service Level Agreements, supplied CPE plus support for 10BaseT, 100BaseTX and 1000BaseLX are all available with XO Ethernet Services.

With XO™ **Ethernet Services**, you can:
- Reduce WAN performance bottlenecks with bandwidths from 10 Mbps up to 1 Gbps (Gigabit Ethernet);
- Simplify LAN / WAN transport interconnection management;
- Lower costs by reducing the need for in-house transport technical staff and
- Implement a solution that can scale to support your business as it grows.

Ethernet Services:
- Simplify the interconnection of your dispersed location within and between metro areas served by XO™;
- Ensure optimum backbone-class performance when sending data between locations;
- Eliminate your need to purchase or manage transport Customer Premise Equipment (CPE);
- Free you from WAN transport performance constraints, and
- Are backed by customer care representatives dedicated to servicing your account 24x7.

For businesses with multiple locations in and between metropolitan areas, Ethernet Services provide a simple, cost-effective solution to private network interconnectivity. You can achieve point-to-point or any-to-any connectivity — or a mixture of both. Ethernet Services eliminate the need for ongoing configuration and management and additional equipment.

Now you can enjoy the benefits of broadband LAN interconnection without the added expense.

Optional Features:
- Unprotected Ethernet Services. If you need point-to-point connections at speeds of 100 Mbps or 1 Gbps but don't need the complete Service Level Agreement, Unprotected Ethernet Services may be right for you.
- Fibre Channel and ESCON Support. Get the most out of your Ethernet implementation by taking advantage of our special support services for Storage Area Network (SAN) providers and for those that need to connect multiple IBM® mainframes.
- Serial Managed Connectivity between Cities
- Reserved Ports

Ethernet Service Advantage

Ethernet Service delivers superior dedicated bandwidth and service for your private network at a reduced cost.

Ethernet Services make private network interconnectivity simple. Enjoy backbone-class bandwidths across your multi-facility network — without the cost and responsibility of purchasing, configuring and managing additional transport equipment.
