

XO™ PRIVATE LINE

High-Bandwidth, Dedicated Connectivity for Data Applications

XO PRIVATE DATA NETWORKING

Nationwide fiber optic network, high-capacity bandwidth choices, full-time availability, 24x7 network monitoring, flexible terms and a single point of contact are all features of XO Private Line.

With Private Line Service, you can:

- Secure sensitive information with private connectivity;
- Instantly transmit mission-critical data with point-to-point connectivity;
- Streamline enterprise communications with a nationwide fiber optic network;
- Increase productivity with 24 x 7 guaranteed network availability; and
- Simplify your accounts payable with one invoice for all your XO™ services.

Private Line:

- Helps you control your communications expenses with flat-rate billing;
- Minimizes downtime with continuous network monitoring; and
- Provides flexibility with three types of service.

Now you can choose from among several high-capacity bandwidth options for your private network. Whether it's T1, T3, or OC-x, this service provides dedicated point-to-point connectivity, reducing the bottlenecks associated with switched public networks. Private Line Service is for companies that mean business.

The Private Line Advantage

Benefit from both privacy and flexibility. No matter where you are or where you need to send data, XO™ has you covered:

On-Net to On-Net: Both ends of the circuit connected to the XO™ network;

On-Net to Off-Net: One end of the circuit connected to the XO™ network; and

Off-Net to Off-Net: Neither end of the line connected to the XO™ network.
